

# Balance Performance & Transformation in Critical Infrastructure

Use Bentley Value Creation workshops to help accelerate your digital transformation while maintaining peak performance

## The Challenge:

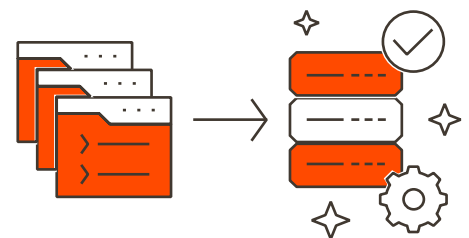

### Transforming While Performing

Owner-operators of critical infrastructure face pressure to maintain operations while transforming for the future. Challenges like aging infrastructure, labor shortages, and growing sustainability and regulatory demands limit time and resources for digital transformation. Despite its known benefits for efficiency, many struggle to identify where to start or which digital projects offer the best return.

## The Solution:

### Bentley Value Creation Workshops

Bentley Value Creation Workshops are consulting engagements designed to help resource-constrained infrastructure owner operators quickly identify and prioritize digital transformation projects that maximize socioeconomic value. These workshops deliver a personalized strategy to transform while performing — a custom roadmap of digital transformation projects — that has organizational buy-in, is easy to implement, and delivers positive, measurable results.

## Benefits

- ✓ **Faster Stakeholder Alignment** through a data-driven, inclusive process
- ✓ **Quick Identification & Prioritization** of high-impact digital transformation projects
- ✓ **Scalable, Practical Roadmap** tailored to your needs

## Features

- 🔍 **Value Framework:** A consistent, inclusive process that builds stakeholder alignment, ensures integrity, and reduces risk
- 🔍 **Value Toolkit:** Streamlines assessment with proprietary templates, data, and benchmarking tools
- 🔍 **Value Profile:** Delivers personalized recommendations with prioritized projects and investments, based on strategic and financial value

---

## Use Cases

Bentley Value Creation Workshops are applicable to owner-operators in various industries, including:

-  Energy
-  Transportation
-  Water and Wastewater

Specifically, these workshops are beneficial for organizations that are looking to:

- Balance current operational demands with the need for digital transformation.
- Uncover ways to use data more effectively and digitize processes for greater infrastructure resilience, efficiency, safety, and sustainability.
- Accelerate their digital transformation journey with expert guidance and stakeholder alignment.
- Maximize ROI on digital transformation investments.

---

## Why Bentley Value Creation Workshops?

Bentley Value Creation Workshops offer a fast and easy way for owner operators to identify and prioritize digital transformation projects that will improve their infrastructure resilience, efficiency, safety, and sustainability.

By leveraging Bentley's industry expertise, proven methodology, and proprietary data, organizations can rapidly unlock hidden asset value, achieve faster stakeholder alignment, and make data-driven decisions that maximize ROI.

Case Study Overview:

## Thames Water

Thames Water, the UK's largest water and waste-water company, faced growing pressure from aging assets, climate change, population growth, and rising regulatory demands. To help accelerate its digital transformation and modernize its processes, Thames Water engaged Bentley for a Value Creation workshop.

The workshop helped Thames Water:

- Achieve faster stakeholder alignment.
- Accelerate decision-making with an actionable Value Profile.
- Prioritize digital investments by strategically weighing trade-offs for long-term value creation.
